9.3	10.0	10.8	11.7	<b>86</b>	11.5	10.5	9.7	8.9

<sup>a</sup> Length is measured for children under 2 years or less than 87 cm height. For children 2 years or older or 87 cm height or greater, height is measured. Recumbent length is, on average, 0.7 cm greater than standing height; although the difference is of no importance to individual children, a correction may be made by subtracting 0.7 cm from all lengths above 86.9 cm if standing height cannot be measured.

## Weight for Height/Length Look-Up Table
